FIRE MONITORING SERVICE

★ FIRELINK SERVICE FEATURES

NEW ZEALAND FIRE SERVICE

Firelink is a direct connection to the New Zealand Fire Service (NZFS) automatic Fire Alarm system, ensuring the fastest possible dispatch of fire appliances during emergencies.

SECURE LINK COMMUNICATION

The *Firelink* alarm transport system is IP based and is designed to be continuously operating and able to pass Fire Alarm messages instantly. Line interruption can also be detected immediately, ensuring the communications path is functioning 24/7.

INSTANT MESSAGING SYSTEM

AlarmNZ provides Alarm service agents and customers with an automatic message forwarding system either by *sms*, *email* or *paging*. Additional information can be obtained realtime via the free Alarmnz web portal.

UNIVERSAL NETWORK ACCESS DEVICE

Full connectivity for legacy sgd equipment, new private fire alarms and sprinkler systems is provided for by ALARMNZ's network access device (NAD) and central alarm data switching system.

In accordance with the NZFS automatic Fire Alarm service provider standard, ALARMNZ is a fully accredited Grade 2C Alarm monitoring center registered under NZSA and NZFS guidelines. The Fire Link service offered by the company meets all statutory and regulatory requirements for such activities and conforms to the standards required by most insurers.

ALARMNZ has a reputation for quality data management and service excellence that is recognized by the majority of independent alarm service agents throughout New Zealand.
