★ MEDICLINK SERVICE FEATURES

AMBULANCE AND RESPONSE SERVICES

Medic-link or emergency alarm messages can be sent directly to the N.Z. Ambulance Service, family members, health professionals and/or other call-out representatives via IP, SMS, Email or voice should a health situation require immediate attention.

MOBILE TECHNOLOGY

Medic-link products are based on hands free mobile phone technology and include the ability to roam free within most towns and cities across the country and still maintain connectivity to the ALARMNZ monitoring system and helpdesk team.

GPS TRACKING & MAPPING SYSTEMS

Each device supplied to medic-link customer includes assisted Global Positioning System technology that in emergencies gives the ALARMNZ helpdesk operator and/or family friends the ability to locate that person via an electronic map instantly.

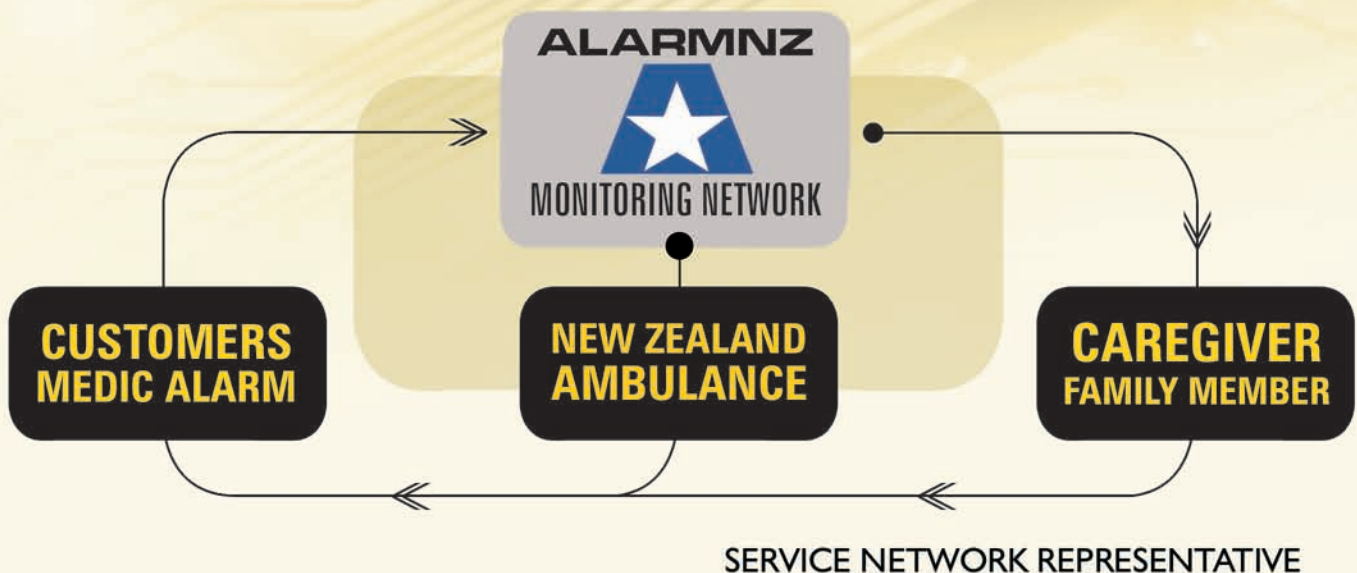

SOLUTIONS FOR ALL AGES

Medic-link mobile devices come in all styles and packages from small pendant wrist phones to GSM phones with large phones designed for the elderly. Accessories include Bluetooth devices that can transmit clinical standard heart rate and blood oxygen levels to health professionals in real-time.

ALARMNZ is a fully accredited Grade 2C Alarm monitoring centre approved and registered with all relevant government agencies for the delivery of emergency alarm response services. The medic-link technology offered by the company meets all statutory requirements for such devices and conforms to standards required by health authorities.

ALARMNZ has a reputation for careful data management and service excellence and recognized by the majority of independent alarm service agents throughout New Zealand as the quality leader.
